

# Contents

<b>How science works</b>	4
1 What is science?	4
2 Using a microscope	7
3 Safety in the laboratory	9
<b>Unit 1 Living things</b>	11
<i>Cells</i>	11
1 Discovering cells	11
2 Comparing plant and animal cells	14
3 Building tissues	16
<i>Human body</i>	19
4 Organs and organ systems	19
5 The skeleton	22
6 Muscle power	25
7 Nervous system	28
8 Circulation	31
9 Excretion	34
10 Communicable diseases	36
11 Deficiency diseases	39
12 Lifestyle diseases	41
13 Vaccination	44
14 Drugs	46
<b>Unit 2 Matter and materials</b>	49
<i>Compounds and reactions</i>	49
1 Atoms and molecules	49
2 Chemical reactions	52
3 Acids, bases and salts	55
4 Metals and non-metals	58
<b>Unit 3 Our Earth</b>	62
<i>The Earth's history</i>	62
1 The Earth through time	62
2 The history of life	64
<i>Weather and climate</i>	67
3 Weather conditions	67
4 Weather measurements	69
5 Climate	72
6 The hole in the ozone layer	74

<b>Unit 4 Forces and energy</b>	76
<i>Energy sources</i>	76
1 Using energy	76
2 Fossil fuels	79
3 Global warming	81
4 Alternative energy sources	83
<i>Light</i>	86
5 Reflection	86
6 Curved mirrors	89
7 Refraction and dispersion	91
8 Investigating lenses	94
9 Optical instruments	97
<i>Sound</i>	99
10 Sound waves	99
11 Musical instruments	102
12 Sound reflection and absorption	104
<i>Electricity and magnetism</i>	107
13 Series and parallel circuits	107
14 Electricity in the home	109
15 Paying for electricity	112
16 Using electricity safely	115
17 Investigating static electricity	117
18 Lightning and other hazards	121
19 Magnets: poles and fields	124
20 Making magnets	128
21 The Earth's magnetism	131
<i>Communications</i>	133
22 Telecommunications	133
23 Computers and the Internet	136
<b>Unit 5 Astronomy</b>	139
1 How big are the planets?	139
2 Stars and galaxies	142
3 Observing the Universe	144
4 Space travel	147
<b>Glossary</b>	150
