

## Planning, Homework & Assessment

How Share It! makes these three key aspects of teaching easy

*A quick reference guide to accompany the Making the Most of Share It! video series*

### PLANNING

#### YOUR KEY TOOL: THE TEACHER EDITION

##### *Before class:*

**Lesson Plans** explain the basic structure of each type of lesson in the unit and how each type of lesson works, e.g. *the vocabulary lessons*. They also explain the **routines** which are the activities that you find in every unit, e.g. *the unit opener*.

**Lesson Notes** are detailed notes on the activities that are specific to each lesson.

**Teacher Tips** are also included in the lesson notes for most lessons, with helpful ideas on *Classroom Management, Communication and Socio-Emotional Learning*.

##### *After class:*

**The Teacher Reflection Plan** offers you the chance to reflect at the end of each class and evaluate what is working well with your students and what might be improved.

**Ideas for sharing** are also included so that you can set up a Teachers' Share It! program with other teachers in your school, to help and learn from each other.

### HOMEWORK

#### YOUR KEY TOOL: THE WORKBOOK

**The Workbook** has one page for every lesson in the Student Book so students have another chance to practice what they have seen in class. It includes lots of different activity types to practice vocabulary, grammar, reading and writing.

### ASSESSMENT

#### YOUR KEY TOOLS: THE STUDENT BOOK & THE TEST GENERATOR

**The Student Book** offers a wide range of listening, reading and writing activities in the style of Cambridge English Qualifications for Young Learners to give your students lots of practice in exam-style activities.

**The Test Generator** has ready-made unit, mid and end of year tests for the course that you can download or you can use it to create and save your own tests.
