For Fun: Can you match these images to the emotion?

When networking, remember

"Body language is a very powerful tool. We had body language before we had speech, and apparently, 80% of what you understand in a conversation is read through the body, not the words." *Deborah Bull*

Look at these faces, often used on mobiles phones and emails. Which emotion would you associate with each face?
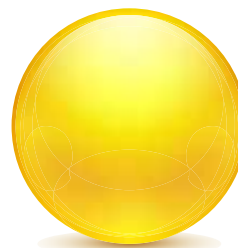

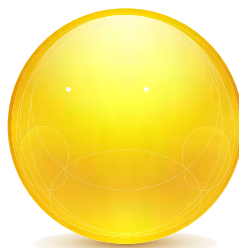

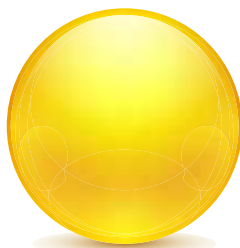

happy

sad	in love	exhausted	angry
forgetful	surprised	embarrassed	confusing
hungry	shut-up	~~happy~~	laughing

Now draw your own faces to represent 4 other emotions. Do others know what the emotions are.

For Fun: Can you match these images to the emotion?

Answers

happy	sad	angry	forgetful
exhausted	embarrassed	hungry	in love
surprised	confusing	laughing	shut-up
