

Costumes and make-up

Costume designers research and make the costumes for the actors. The costumes help us to imagine a different time or place.

Now a make-up artist is putting make-up on the actress. Sometimes, it can take hours!

Special effects

Many films use special effects to make things like the character in this photo. Special effects make difficult scenes and characters possible.

Animations use computer pictures or models. What is your favourite animation?

Some animations use hundreds of pictures for just ten seconds of film!
