

# Contents

<b>How science works</b>	4
1 What is science?	4
2 Observing and investigating	6
3 Safety in the laboratory	9
<b>Unit 1 Living things</b>	11
<i>Life processes</i>	11
1 Living and non-living things	11
2 The characteristics of life	13
3 Nutrition	16
4 Respiration – how do plants and animals breathe?	19
5 Movement and growth	21
6 Sensing and responding	24
<i>Plants</i>	27
7 Plant parts and characteristics	27
8 The variety of plants	30
9 Investigating leaves	33
10 Investigating roots	36
11 Flowers, fruits and seeds	39
12 How non-flowering plants reproduce	42
13 Useful plants	45
<i>Animals</i>	48
14 Animal life	48
15 Vertebrates	50
16 Invertebrates	53
17 Animal behaviour	56
18 Useful and harmful animals	59
<i>The environment</i>	62
19 Habitats and adaptations	62
20 Deserts, rivers and reefs	65
21 People and the environment	68
<b>Unit 2 Matter and materials</b>	71
<i>Materials</i>	71
1 Different materials	71
2 Choosing materials	73
3 Marvellous metals	75
<i>Matter and heat</i>	78
4 Heat and its effects	78
5 Temperature and thermometers	81
6 How heat travels	84
7 Heat conductors and insulators	87
8 Solids, liquids and gases	89
9 Changing state	91

<b>Unit 3 Our Earth</b>	93
<i>Rocks and minerals</i>	93
1 The Earth	93
2 Investigating rocks	96
3 Types of rock	98
4 Minerals and their properties	101
5 Using minerals	103
6 Weathering and erosion	105
<i>Oceans</i>	108
7 Oceans, seas, rivers and lakes	108
8 Under the surface	111
9 Waves and tides	114
10 Pollution at sea	117
<b>Unit 4 Forces and energy</b>	119
<i>Energy</i>	119
1 Energy: forms and changes	119
2 Using energy	122
3 Solar energy	125
<i>Sound</i>	128
4 Sound	128
5 Hearing sounds	131
6 Sounds: good and bad	134
<b>Unit 5 Astronomy</b>	137
1 The solar system	137
2 Looking at the planets	139
3 Asteroids, comets and meteors	142
<b>Glossary</b>	144
