Why don't you eat the scorpion?
He's more delicious than me.
OK, my friend, you run away,
See you again some day.

Right! Scorpion, you're for me!
But what's this? Crunch, crunch!
This is not delicious!
It's the most disgusting lunch!

Let's visit ...

1 Read about the biggest lizards in the world.

There are real dragons living in Indonesia. It's true! They live on the island of Komodo. The Komodo dragon is the biggest, meanest, and most dangerous lizard in the world. Most Komodo dragons sleep in the hottest part of the day, and then they look for food when it's cooler. They don't live in groups, but sometimes they like eating together. The biggest lizards always eat first and the smallest ones eat last. Komodo dragons are carnivores – they eat chickens, goats, and even small cows or deer. They're also cannibals because they eat other Komodo dragons! The island of Komodo is very beautiful. It has big, clean beaches. You can dive in the ocean and see some of the most colorful, beautiful, and interesting fish in the world. But be careful! Komodo dragons can swim, too!

IT'S A FACT!

A komodo dragon's tail is longer than its body.

2 Find and write.
