Holidays in the future

Holidays in the future will be very different. Journeys will be short and safe. People will travel with fast spaceships and they won't use cars, trains or boats. They won't go on camping holidays or stay in tents and hotels. They will eat and sleep on space stations.

Cars will be automatic - they will have a computer and it will do everything. You won't drive to the mountains or seaside. You will choose the place and time and the automatic car will take you. You won't feel tired from the journey because in the car you can relax and watch TV and play games. There won't be traffic or pollution. Travelling will be clean and comfortable. Tourists won't go fishing in the sea. They will fly in space and relax on the Moon.

Dear Penpal,

Hi! Hope you're OK. Are you going on holiday this year?

I'm going camping and it's going to be great. Last year we went on a skiing holiday, but it was horrible. Going camping is better than skiing. The weather is warmer and it is sunny. What are your plans? I can't wait to hear about them.

All the best,
Erika
